Respectfully submitted, Kimberly Beeman, Chapter 54 Treasurer

New Business: Chapters plan to conduct joint Chapter 54 & 60 meetings going forward

Presentation: Broadcast Infrastructure 101

This presentation is intended for those not familiar with broadcast operations from the studio all the way to the transmitter site. There's a lot in between and Brian Szewczyk with Gates Air is going to discuss key signal flows and operations covering both broadcast TV and Radio. The presentation applies to all experience levels as we'll need input from the seasoned broadcast engineers. It will be an interactive presentation where attendees are strongly encouraged to ask questions and have discussions. **We invite all studio operators, operations and others you feel can benefit.** Come one, come all!!

Presentation Summary:

- A fresh look at what is required to design and maintain broadcast infrastructures today.
- Typical scenarios that a broadcast technician will need to be familiarized with in the office and the field.
- IP characteristics that are now present in broadcast signal chains.

Meeting adjourned 1:24 PM
